You, renewables & Ince, in any case
In this fast-paced world you are seeking a pro-active business services partner that moves your company forward, someone who understands your challenges and the importance of commitment.

Meet Ince, your trusted partner, in any case.

From our offices in Europe, the Middle East and Asia, our dedicated team of legal and business services professionals can guide you in developing and delivering on your roadmap for sustainable success and provide you with advice that will not only safeguard your business interests but ensure you reap commercial rewards.

Providing you with strategic guidance and well considered advice, we are renowned for the depth and breadth of our legal services and our understanding of the industries in which you operate. We recognise your needs and offer business focussed legal services, together with advice that makes commercial sense.

One firm, in any case

With over 150 years of experience, we have cultivated a seamless ‘one-firm’ approach that is tailored to your personal needs and pairs you with the best legal and strategic business professionals in your field; whenever, wherever, and in any case.

Support, every step of the way

By leveraging our sector expertise, legal skills and market experience, you can feel safe in the knowledge that we will both handle complex legal issues on your behalf while providing you with expert strategic advice when the need arises.

10 countries

23 offices

30 different language capabilities

700+ employees worldwide, including support staff

400+ legal and business services professionals
Renewable energy

We have been advising clients in the offshore renewable field for over 15 years. We represent leading international developers, operators, lenders, contractors, supply and service companies of offshore wind farm projects.

We are at the cutting edge in the industry. Our lawyers have been involved in over half of the UK's offshore wind farm projects, as well as many projects in Germany, France, the Netherlands and Belgium, and in the U.S., China and Taiwan.

Underpinning our legal advice is an in-depth understanding of the political, economic and regulatory framework and the business practices and our clients' commercial needs. We are not simply "maritime", "construction", "M&A" or "finance" lawyers.

Construction, T&I and O&M contracts

Our advice covers tenders and contract review, drafting and negotiation for various types of offshore wind farm contracts, including engineering, procurement, design, transportation, installation, operation and maintenance of wind turbines, foundations, cables and sub-substations, and related vessel and port facilities, on a multi or turnkey contract basis.

Contracting models and formats

We understand onshore/FIDIC-like construction and shipping/ BIMCO and offshore/LOGIC-like construction.

Corporate, finance and M&A

Our specialist finance lawyers advise banks, ECAs, contractors and, owners on all aspects of asset financings, project financings, commodity and export financings, restructurings and workouts. Our expertise extends to wind farms, power plants, vessels and equipment. Our finance lawyers work closely alongside our specialist corporate, insurance and casualty, teams to evaluate the whole range of risks and advise on strategies to minimise exposure on transactions.

We also have considerable experience with joint ventures and M&A transactions in the renewables industry. In addition to our general corporate and M&A expertise, our extensive knowledge of the industry, the players and the projects enables us to add unique value to the due diligence and structuring and negotiating of transactions in the industry.

Project management support

In providing such advice, we draw on our experience of dispute resolution; having seen where things can go wrong, we are well placed to advise on contractual risk management strategies.

Dispute resolution

Our energy dispute resolution practice is world leading and we have significant experience with disputes in the offshore wind industry. We advise on all manner of offshore construction disputes including variations, defects in design and construction, delay and cost overruns and warranty claims, offshore incidents and casualties from the consequences of collisions with fixed or floating objects, through salvage and pollution, to the drafting of – and disputes under – insurance policies.

Industry connections

Our lawyers understand the market and the factors essential to make this operate efficiently. Chris Kidd worked with BIMCO to develop SUPPYTIME 2017, WINDTIME, the standard offshore wind farm personnel transfer and support vessel charterparty which came into effect in 2013 and NEWBUILDCON, a standard shipbuilding contract.
## Our offering and experience

<table>
<thead>
<tr>
<th>Feature</th>
<th>Summary</th>
<th>What are the benefits for you?</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>360° “cradle to grave” approach – extensive experience from energy project development, procurement, construction, financing and M&amp;A.</strong></td>
<td>We have significant experience advising a wide spectrum of stakeholders on all corporate, construction, finance, corporate and M&amp;A and regulatory aspects of large complex on- and offshore wind power projects. Our energy disputes practice can assist when issues arise.</td>
<td>You will receive integrated legal advice which takes into account the legal and commercial risks and opportunities at all stages of your project, from business development and tender phase through to signing and completion and claims and any disputes.</td>
</tr>
<tr>
<td><strong>Combined maritime, construction, finance and transaction law background – significant experience with offshore construction projects and transactions.</strong></td>
<td>We have been the leading provider of legal services to the maritime industry for 150 years providing advice to clients on all types of contracts and legal issues involved on the project.</td>
<td>Your project risks are managed and minimised through an integrated understanding of the full contractual, tort, regulatory and insurance regime on the project.</td>
</tr>
<tr>
<td><strong>Particular experience with offshore wind projects, transactions and disputes.</strong></td>
<td>Our team has been involved in over half of the offshore wind farm projects to date and have a deep understanding of the issues facing the players in the industry. We provide you with proactive legal advice on and can be actively involved or take a leading role in the negotiations.</td>
<td>Throughout the process we are able to identify the specific legal issues relevant to your scope on the project or your transaction and provide commercial solutions. Our extensive experience from project development, procurement and execution enables us to add additional value on the due diligence and structuring of financing and M&amp;A transactions in the offshore wind industry. Our experience from offshore wind disputes means we know where issues can arise and help you mitigate these before commencing work.</td>
</tr>
<tr>
<td><strong>Strong renewable energy industry focus – know the players and understand the issues, in a commercial context.</strong></td>
<td>We have an impressive industry network – full range of stakeholders, at all levels – through advising clients, having worked in the commercial organizations, been onsite and through collaboration with industry organisations on the development of new standard forms of contracts.</td>
<td>We have a full understanding of the commercial drivers – both internal and external and provide innovative solutions. We understand all parties objectives and are able to anticipate and resolve legal issues.</td>
</tr>
<tr>
<td><strong>At the cutting edge – lead industry development.</strong></td>
<td>We stay abreast and drive the development of new contractual and financial models, standards and formats through our advice on ground-breaking contract structures and terms and conditions on individual projects. As a result we have acted on the development of many of the “first type” of a project, structure or financing, or in a specific country or industry segment.</td>
<td>Our legal advice at the forefront of the development within the offshore wind industry places you in the best position to deliver to time and budget.</td>
</tr>
<tr>
<td><strong>Significant experience from choice of contracting model and form, joint ventures, consortiums, M&amp;A and finance expertise.</strong></td>
<td>We have expertise advising on the available options for contracting models and understand both onshore/ FIDIC-like construction and shipping/BIMCO and offshore/LOGIC-like construction.</td>
<td>We can help you optimise your contracting model/format and joint venture, consortium or finance structure with your partner(s) and assist in the establishment of any necessary corporate entities and security arrangements.</td>
</tr>

Our team

Chris Kidd, Joint Head of Energy & Infrastructure, is supported by a team of lawyers in our London and Hamburg offices. Our core team is outlined below.

Chris specialises in advising offshore wind farm contractors and developers, shipyards, buyers, and owners on shipping and other offshore matters. He has over 35 years' experience with the firm.

He advises on the drafting and negotiation of contracts in the renewables sector including offshore wind farm installation contracts, charterparties and contracts for the construction of wind farm installation vessels. He has been involved in Greater Gabbard, Gunfleet Sands, London Array, West of Duddon Sands, Borkum Riffgat, Kentish Flats, Westermost Rough, Gwent Y Mor, amongst others. He has worked with BIMCO to develop SUPPLYTIME 2017 and WINDTIME.

Chris also frequently advises buyers and shipyards in relation to building, conversion and repair contracts, as well as dispute resolution, for conventional and specialist offshore vessels, and floating platforms. He assisted BIMCO to develop NEWBUILDCON, a standard form newbuilding contract.

Chris has specialist experience in jurisdictional issues, mediation and major London arbitrations and litigation, particularly for claims arising from shipbuilding, conversion and repair contracts. His experience includes LMAA, ICC and LCIA arbitrations, as well as cases in the Commercial Court, Hong Kong Courts and liaising with lawyers conducting litigation in other jurisdictions.

"Understands client needs and always gives first-class advice"
- The Legal 500 UK
Our team (cont.)

Christian Reinart
Partner, Hamburg
D +49 403 808 6085
Christian.Reinart@incegermany.com

Christian is the head of our Energy & Infrastructure Group in Hamburg. A large part of Christian’s work concerns renewable energy, in particular advising clients on offshore construction and installation contracts. He is familiar with a range from FIDIC red-, yellow- and silver book, BIMCO SUPPLYTIME 2005, BIMCO WINDTIME to a great number of tailor made installation and charter contracts which are frequently used in the German market. He has assisted in negotiations and contractual claims handling of most of the relevant components of an offshore wind farm. His experience covers transport and installation of foundations, transition pieces, substations and HVDC converter platforms, infield cable laying, chartering of CTVs, repair and O&M works at a sub-station including chartering of the related marine spread, as well as project management services and employment issues.

Apart from his energy and construction practice, Christian also assists clients, mainly ship finance banks, in relation to all factual and legal aspects of restructuring, enforcement and compliance issues with a particular focus on German and EU insolvency law.

David Choy
Managing Associate, London
D +44 (0) 20 7551 8506
DavidChoy@incegd.com

David advises clients on a range of matters in the shipping, energy and infrastructure and renewable energy sectors.

He frequently advises clients on the drafting and negotiation of shipbuilding contracts, refund charterparties and service agreements.

He has also acted for clients on a range of high value, complex and multi-jurisdictional disputes in the shipping and energy and infrastructure sectors. His experience includes cases concerning drilling, services and construction contracts.

David has a particular focus on shipbuilding and has represented ship-owners and shipyards in disputes relating to delay and disruption claims, variations, warranties and termination issues. David’s recent experience includes advising on shipbuilding contracts, framework agreements and charterparties (including bespoke contracts and those on the Supplytime forms) for wind turbine installation vessels, vessels operating in the renewable sector and offshore support vessels.

“...has vast experience in shipbuilding matters”

Appendix 2: Additional experience

Wind farm experience

- Acting for EBRD, FMO and Clean Energy on the development and successful project financing of the 50MW Salkhit Wind Farm in Mongolia (the first privately developed wind farm in Mongolia);
- Acting for the Asian Development Bank and the local lenders on the successful project financing of the 200 MW Korat Wind Farm in Thailand, the largest wind farm project financed in Asia at that time;
- Advising clients in relation to Borkum Riffgat off the coast of Germany;
- Advising clients in the bidding process to develop four out of five offshore wind farm sites off the coast of France;
- Advising a contractor on the FIDIC suite of contracts for the supply, installation and testing of 80 cables required for an offshore wind farm;
- Advising in connection with contracts for the construction of specialist wind farm installation and heavy lift vessels to be used in the industry;
- Advising an underwriter on coverage pursuant to various policies of insurance in respect of certain projects where defects were found in the foundations;
- Advising clients in connection with disputes arising under various contracts generally;
- Advising on contracts for the construction and conversion of specialist installation vessels and their associated financing;
- Advising a project manager on a contract for project management services for a German offshore wind farm;
- Undertook a secondment to a contractor for a major offshore wind farm construction project to assist on a daily basis during the execution phase;
- Advising various owners on chartering vessels to contractors for offshore wind farms, including remedies in the insolvency of critical subcontractors;
- Advising a Belgian offshore construction company in connection with the installation of turbines in a German offshore wind farm and the insolvency of the turbine supplier;
- Advising a consortium of contractors in connection with the tender for the turnkey cable laying contract (onshore and offshore) to connect a HVDC converter platform in the German EEZ to the German onshore grid;
- Assisting a German construction company during project execution and general contract management in relation to the installation of foundations and WTGs in a German offshore wind farm;
- Advising Dutch and Danish contractors in tender proceedings and subsequent contract negotiations concerning the installation contracts for offshore wind turbine foundations;
- Drafting contract templates for a turbine supplier and a wind farm owner in relation to WTG installation and defined O&M tasks respectively;
- Representing a major Danish steel contractor in a high value dispute regarding warranty claims for the transformer platform of a large German offshore wind farm;
- Representing a Danish offshore company and shipowner in a high value dispute against an international energy company in respect of a contract for the investigation of the soil for building a wind farm in the German North Sea;
- Assisting German onshore wind farm owners in negotiations with their turbine supplier in respect of performance issues of wind turbines; and
- CAR policy reviews for Danish offshore wind contractors in connection with a turbine installation contract.

Other renewables experience:

- Regularly advising a major European utility with regard to its biomass trade contracts, including long term supply contracts and related carriage contracts;
- Advising UK/Russian interests in a project for the refurbishment and operation of a hydro-electric plant in the former Soviet Union. This included drafting the agreement for the operation of the plant and providing for repayment of the costs of refurbishment out of electricity generated and sold;
- Advising on insurance claims involving geothermal, portable, and LNG-fuelled power plants;
- Representing two major European utilities groups in connection with arbitration proceedings and other disputes arising out of biomass contracts;
- Advising the local and international lenders on the $450 million acquisition and project financing of the Tiwi and Makban geothermal projects in the Philippines; and
- Advising the international developer on a greenfield geothermal project in Indonesia.
